OPTICS COMMUNICATIONS

Volume 222, numbers 1–6, 1 July 2003

Abstracted/Indexed in: Chemical Abstracts/Current Contents: Engineering, Computing and Technology/Current Contents: Physical, Chemical & Earth Sciences/EI Compendex Plus/Engineering Index/INSPEC

Contents

Propagation and scattering

L. Michaille, M.W. McCall, Y.C. Lai and J.A.R. Williams, Analysis of single and multiple, non-permanent, tunable, birefringent spectral holes in a fibre-Bragg grating stop-band produced via uniaxial pressure 1

P.P. Rajeev and G. Ravindra Kumar, Polarization independent hot electron production from modulated solid surfaces 9

V. Gerginov and C.E. Tanner, Fluorescence of a highly collimated atomic cesium beam: theory and experiment 17

I.A. Vartanyants and I.K. Robinson, Origins of decoherence in coherent X-ray diffraction experiments 29

Z.L. Horváth and Z. Bor, Focusing of truncated Gaussian beams 51

H. Wang, Z. Zhang, L. Chai and Q. Wang, A method to analyse Talbot array illumination of an arbitrary multiple phase grating 69

C.A. Dartora, M. Zamboni-Rached, K.Z. Nóbrega, E. Recami and H.E. Hernández-Figueroa, General formulation for the analysis of scalar diffraction-free beams using angular modulation: Mathieu and Bessel beams 75

J. Primot, Theoretical description of Shack–Hartmann wave-front sensor 81

N. Ghosh, P.K. Gupta, H.S. Patel, B. Jain and B.N. Singh, Depolarization of light in tissue phantoms – effect of collection geometry 93

J. Floriot, F. Lemarchand and M. Lequime, Double coherent solid-spaced filters for very narrow-bandpass filtering applications 101

P. Johannisson, D. Anderson, M. Lisak and M. Marklund, Nonlinear Bessel beams 107

G. Gbur and T.D. Visser, Coherence vortices in partially coherent beams 117

L. Froehly, S.N. Martin, T. Lasser, C. Depeursinge and F. Lang, Multiplexed 3D imaging using wavelength encoded spectral interferometry: a proof of principle 127

X. Zeng and Y. An, Error analysis for the far-field of a small plane source 137

Optical information, image formation and analysis, optical computing

S. Chang, M. Rioux and C.P. Grover, Range face recognition based on the phase Fourier transform 143

Optical communications

E. Knudsen and A. Bjarklev, Modelling photonic crystal fibres with Hermite–Gaussian functions 155

E. Alvarez, H. Soto and J. Torres, Investigation of the carrier density dependence on the confinement factor in a bulk semiconductor optical amplifier with a ridge waveguide 161

P. Li, J. Shuisheng, Y. fengping, N. Tigang and W. Zhi, Long-haul WDM system through conventional single mode optical fiber with dispersion compensation by chirped fiber Bragg grating 169

H. Miao, C. Yang, S. Li and Y. Yan, Feed-forward polarization mode dispersion compensation with a step control algorithm 179

H. Yonglin, L. Jie, M. Xiurong, K. Guiyun, Y. Shuzhong and D. Xiaoyi, High extinction ratio Mach–Zehnder interferometer filter and implementation of single-channel optical switch 191

H. Kumar, R.S. Kaler, T.S. Kamal and A.K. Sharma, Performance of optical DSB signal based millimeter wave communication system with higher-order dispersion 197

OPTICS COMMUNICATIONS

Volume 222, numbers 1–6, 1 July 2003

(Continued from page 4 of cover)

J.-C. Dung, S. Chi and C.-C. Chen, Characteristics of the erbium doped fiber amplifier with polarization mode dispersion compensation 207

S. Choi and K. Oh, A new LP_{02} mode dispersion compensation scheme based on mode converter using hollow optical fiber 213

J. Mora, B. Ortega, J.L. Cruz, J. Capmany, D. Pastor and M.V. Andrés, White light sources filtered with fiber Bragg gratings for RF-photonics applications 221

K. Thyagarajan and J. Kaur Anand, Intrinsically gain-flattened staircase profile erbium doped fiber amplifier 227

D.B.S. Soh, J. Nilsson, J.K. Sahu and L.J. Cooper, Geometrical factor modification of helical-core fiber radiation loss formula 235

P. Lu, L. Chen, S.J. Mihailov and X. Bao, Statistical distribution of pulse broadening/narrowing due to the interaction of polarization mode dispersion and frequency chirp in dispersion-shifted fiber 243

Atomic and molecular physics

K.G. Vlachos, Optical clock recovery and clock division at 20 Gb/s using a tunable semiconductor fiber ring laser 249

Condensed matter

H. Yoshida, H. Fujita, M. Nakatsuka, A. Fujinoki and K. Yoshida, Fused-quartz glass with low optical quality as a high damage-resistant stimulated Brillouin-scattering phase-conjugation mirror 257

Z. Sekkat, H. Ishitobi and S. Kawata, Two-photon isomerization and orientation of photoisomers in thin films of polymer 269

O. Qasaimeh, An analytical model for quantum dot semiconductor optical amplifiers 277

D. Rouède, Y.L. Grand, L. Leroy, J.R. Duclère and M. Guilloux-Viry, Nonlinear optical properties and domain microstructure of epitaxial $SrBi_2Nb_2O_9$ thin films on $SrTiO_3$ and on MgO substrates studied by second-harmonic generation 289

A. Keffous, M. Siad, Y. Belkacem, M.A. Zitouni, N. Benrakaa, H. Menari, A. Dahmani, W. Chergui and A. Cheriet, Effect of the lithium diffusion into n-type silicon on the spectral response of the Schottky photodiodes 299

J.A. Sherwin and A. Lakhtakia, Nominal model for the optical response of a chiral sculptured thin film infiltrated by an isotropic chiral fluid-oblique incidence 305

Quantum optics

C. Monterola and C. Saloma, Solving the nonlinear Schrödinger equation with an unsupervised neural network: estimation of error in solution 331

Laser physics and laser sources

F. Riemenschneider, I. Sagnes, G. Böhm, H. Halbritter, M. Maute, C. Symonds, M.-C. Amann and P. Meissner, A new concept for tunable long wavelength VCSEL 341

(Continued inside)

OPTICS COMMUNICATIONS

Volume 222, numbers 1–6, 1 July 2003

(Continued)

A. De Backer, J.C. Garreau, I.M. Razdobreev, P. Szriftgiser, I.V. Voroshilov, V.A. Lebedev and E.V. Stroganova, Laser performance of new crystal Cr^{3+}:$(CeGd)Sc_3(BO_3)_4$ 351

Q. Liu, H. Wu, M. Gong, P. Yan, B. Shi and D. Wang, GaAs as a passive Q-switch and Brewster plate for pulsed Yb:YAG laser 355

D.-L. Cheng, T.-C. Yen, J.-W. Chang and J.-K. Tsai, Generation of high-speed single-wavelength optical pulses in semiconductor lasers with orthogonal-polarization optical feedback 363

M. Lando, J. Kagan, B. Linyekin and V. Dobrusin, A solar-pumped Nd:YAG laser in the high collection efficiency regime 371

D. Wolfersberger, F. Lhommé, N. Fressengeas and G. Kugel, Simulation of the temporal behavior of one single laser pulse in a photorefractive medium 383

S. Atkins, B. Vodonos, A. Bekker and B. Fischer, Fractional dispersion-modes in a pulsed fiber laser 393

P.K. Mukhopadhyay, M.B. Alsous, K. Ranganathan, S.K. Sharma, P.K. Gupta, J. George and T.P.S. Nathan, Simultaneous *Q*-switching and mode-locking in an intracavity frequency doubled diode-pumped Nd:YVO_4/KTP green laser with Cr^{4+}:YAG 399

Nonlinear optics

J.T. Mendonça and H. Crespo, Sliding resonance of parametric optical processes 405

J. Santhanam and G.P. Agrawal, Raman-induced spectral shifts in optical fibers: general theory based on the moment method 413

S. Ashihara, J. Nishina, T. Shimura, K. Kuroda, T. Sugita, K. Mizuuchi and K. Yamamoto, Nonlinear refraction of femtosecond pulses due to quadratic and cubic nonlinearities in periodically poled lithium tantalate 421
